Fibrex GFRC & Interiors SMC Private Limited is a leading specialist in exterior and interior decoration of buildings established in 2019, the company is a reputable leader in GFRC, GFRG, and GRP solutions in Pakistan

Our mission is to deliver extraordinary workmanship within budget and schedule

Our Vision is to create future-ready designs by learning from the past

A decorative collage on the left side of the slide, featuring three distinct architectural images. The top image shows the ornate interior of a cathedral with gold leaf detailing and arched windows. The middle image shows the exterior of a classical building with columns and arches. The bottom image shows a modern building facade with a white, geometric, perforated screen. The collage is framed by dark blue diagonal lines.

Our Products

GFRC

Glass Fiber Reinforced Gypsum (GFRG) are composites of gypsum cement or concrete reinforced with glass fibres

Process Overview

Mixing high-density gypsum or concrete with water
Reinforcement with glass fibers
Mold pouring and natural drying

[illegible]

Conti...

Application:

Ceilings, walls,
columns, and domes

Balustrades,
sculptures, moldings,
and medallions

Panels and
architectural
embellishments

Benefits:

Lightweight and
durable

Crack-resistant and
non-combustible

Moldable into various
shapes and finishes

Advantages:

Environmentally
friendly

Durable against
extreme weather
conditions

Reduces the load on
the existing
structures.

GRG

Glass Reinforced Gypsum (GRG) utilizes a mix of mortar, glass fiber matting/fiberglass hacked strands and metal/lumber
Normally harder

Advantages

High strength and surface hardness
Great propagation of fine detail
Low extension guarantees layered precision
abstaining from breaking and breakage Whitene

Designs

GFRP

Glass Fiber-Reinforced Plastic (GFRP)(also known as GRP or Glass-Reinforced Plastic)is a polymer composite material

Advantages

Superior Strength: GFRP has an excellent strength-to-weight ratio, outperforming many materials

Lightweight: Weighing just 2 to 4.5 lbs. per square foot, it enables faster installation, reduced structural framing, and lower

Designs

UHPFRC

Super High-Performance Fiber-Reinforced Concrete (UHPFRC) is a composite material which contrasts from a normal cement in numerous ways

Advantages

Design of building structures,
components, civil works and bridges
Industrial realizations (both on-site and
in precast factories)
Large-scale applications
Development of standards and
